How to certify your **Passport or Driver's Licence**

Documents that are certified incorrectly will not be accepted, and this may cause a delay in your application to register. Follow the instructions to correctly certify your passport or drivers' licence. You may wish to present this instruction to the person certifying your document.

Present the original passport and a copy to a certifier who must be an independent person other than the applicant, such as a solicitor, An Garda Síochána, a Peace Commissioner, or a Commissioner for Oaths.

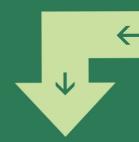

The copy must then be signed, dated and stamped by the certifier.

This certification is then written onto the copy by the certifier.

I hereby certify that the within passport has been compared with the original document, as produced to me on 13/05/2020 by <u>Joseph</u> <u>Bloggs</u>, and is a true copy.
